Professor J. M. MacBain,
University of Bristol.

Dear Professor MacBain:

I have to thank you for your remembrance of me in sending me pamphlets which contain your recent researches in Chemistry. I congratulate you on the work that you have been doing, and I hope that it will continue to be successful.

I heard of you last summer through Professor and Mrs. Leonard. We enjoyed meeting them very much indeed. When you see them next will you give them my kind regards. Please accept also the compliments of the season from myself,

I am,

Yours sincerely,

President.
